Work Experience

Software Engineer
SplashLearn, Gurgaon, HR, India
May 2022 – Present
- Primary owner of multiple key modules including Dashboard, Manage Screen and Assignments page.
- Optimized node modules and reduced the build time from 60 to 9 seconds.
- Lazy loaded components and made entry points to reduce initial load time by 40%.
- Created a UI library to promote reusability of components/assets.
- Streamlined coding practices by introducing a MVC like architecture to develop new pages.
- Implemented an API caller to intercept the request/response for better error handling.
- Worked with and optimized legacy code to help improve the code debt.

Frontend Engineer
Cyberboxer, Delhi, India
Feb 2021 – May 2022
- Designing and developing multiple projects using **Next.JS** and **TypeScript.**
- Working with open source map libraries like leaflet.js and Google maps.
- Added custom features to map services. Adding multiple layers and running queries on runtime.
- Working with **ANT** design library.
- Optimizing runtime of web application by introducing proper state management and doing cleanups.
